Hello,

The following submission has been created.

Track Name: Track 10: Smart & Sustainable Energy Solutions

Paper ID: 406

Paper Title: Virtual Visit To Indian pilgrimages "DARSHAN"

Abstract:

Using state-of-the-art technologies like Virtual Reality (VR), Augmented Reality (AR), and 360-degree panoramic views, the project "Virtual Visit to Indian Pilgrimages" aims to give users an immersive digital experience of India's sacred sites, allowing them to explore pilgrimage destinations from anywhere in the world through interactive virtual tours, historical insights, guided narrations, and real-time rituals streaming from prominent temples, mosques, churches, and gurudwaras across India. The project is a complete tool for religious inquiry and cultural enjoyment since it incorporates multilingual support, AI-driven tour direction, and user-customizable experiences. This virtual pilgrimage experience preserves and promotes India's rich religious diversity for a worldwide audience while fostering spiritual connections via the use of technology.
